-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election of group II, claims 3-16 and 43 in the reply filed on August 24, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1, 2 and 17-42 are withdrawn from examination.

Claims 4-6 are objected to as being dependent on a rejected independent claim. Claims 4-6 would be allowable if written in independent form.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 7-11, and 43 rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 6153428, issued November 28, 2000 (Gustafsson) in view of.

Gustafsson teaches a method for the enrichment and selection of porcine ES cells homozygous for a disruption in the gene encoding α -1,3-galactosyltransferase comprising the double selection of cells in antibiotic selection media, and then culture of viable cells (col. 12, lines 57-63).

Costa teaches the analysis and selection by flow cytometry of the α (1,3) Gal epitope using anti-Gal α -1,3-Gal antibodies on pig cells (page 1764, col. 2, parag. 1, lines 20-26).

Thus at the time of the instant invention, it would have been obvious to the ordinary artisan to modify the selection method of Gustafsson with the selection method of Costa. The particular cells type to be selected would be obvious as would the particular breed of pig.
